

Water Supply Update

Serving the Communities of Hampton, North Hampton, Rye & Stratham

Weather Trends/Outlook

February was much dryer than average. Precipitation totaled 1.7 inches; approximately half of the long-term average of 3.3 inches. Yet, higher than average precipitation over the past six months has alleviated last year's drought conditions. The U.S. Drought Monitor map shows no dry or drought conditions currently in New Hampshire.

U.S. Drought Monitor New Hampshire

February 28, 2023
(Released Thursday, Mar. 2, 2023)
Valid 7 a.m. EST
